Water Supply WATCH Declaration

On April 6, 2018, the Town of Berryville will begin a maintenance project on its Ground Reservoir. This project will require the tank to be taken off-line and drained. The tank will be off-line for as long as sixteen (16) weeks. During this project water customers should see no change in water system pressure.

Following the Ground Reservoir project the Town's Northwest Elevated Tank will be taken off-line for maintenance as well. The Northwest Elevated Tank project will require the tank to be off-line as long as twelve (12) weeks. During this project water customers in Battlefield Estates and Hermitage subdivisions may notice a slight decrease in water system pressure.

Because each of these projects reduces the Town's storage capacity, the Town's water supply will be reduced by more than ten (10) percent. Accordingly, in accordance with §17-25 of the Berryville Code, a Water Supply WATCH is hereby declared. Under a WATCH Declaration, the following voluntary measures are sought:

Voluntary water conservation.

- Residents/businesses are asked to review their water usage and be aware of and limit high water use including but not limited to overwatering lawns, washing sidewalks and driveways.
- Residents/businesses are asked to water on even or odd days based on their address. If their address is an even number, water on even numbered days, if their address is an odd number, water on odd numbered days.

This WATCH Declaration will remain in effect until it is rescinded.

By Order:

Pat Dickinson, Mayor 4/3/18

Keith R. Dalton, Town Manager 4/3/18
